

## Configure your HW-6400 Scanner to Work with iPhone or Android.

This article contains the steps required to pair the HW-6400 scanner with an iPhone or Android device, you can then easily stock in new products, or stock take existing products.

### Required:

- HW-6400 Scanner
- iOS or Android device
- Xapp Pro

### Configure your Bluetooth scanner to work with either iPhone or Android

1. Push the Orange button to ensure scanner is powered on.
2. Hold the Orange button for 8-10 seconds until it beeps twice, a flashing blue LED means it is in pairing mode.
3. Pair with your iOS or Android device, a solid blue LED means it has paired.

### How do I download the phone app?

#### Apple store

#### Android Store

+44 (0) 1454 418 395

### **How do I open the keyboard to manually add stock quantities or change pricing?**

To bring up the keyboard for entering quantities and prices, double press the Orange button.

### **My scanner beeps constantly when holding down the button?**

This indicates low battery. Charge the battery with the cable provided until fully charged (green light).

### **I cannot pair the scanner with my phone?**

The most common reason for this is that the scanner is paired to another phone, disable Bluetooth on any other devices that have used the scanner, and try pairing again.
